#### **DETAILED ACTION**

#### Pre-Amendment

1. Acknowledgment is made of applicant's Pre-Amendment, filed 31 May 2002. The changes and remarks disclosed therein were considered.

Claims 1-24 are pending in the application.

### Oath/Declaration

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the mailing or post office address of each inventor. A mailing or post office address is an address at which an inventor customarily receives his or her mail and may be either a home or business address. The mailing or post office address should include the ZIP Code designation. The mailing or post office address may be provided in an application data sheet or a supplemental oath or declaration. See 37 CFR 1.63(c) and 37 CFR 1.76.

## Specification

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Application/Control Number: 10/073,475

Art Unit: 2824

Ŋ

4. The abstract of the disclosure is objected to because it uses the phrase "the present invention" in line 1, which is implied. Correction is required. See MPEP § 608.01(b).

## Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1, 2, 9 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Taylor (U.S. Pat. No. 5,497,498).

Taylor in Figs. 1A-1D discloses an electronic system having at least two (see, for example, column 4, lines 65-67) memory modules (or memory systems), each memory module and a corresponding method of retrieving configuration information from the memory module, comprising: a random access memory (13) configured to store data; a supplemental information device (12A, 12B) configured to store supplemental information; an interface connection (or a first connection, including 17 and 11) connected to the memory and the supplemental information device and configured to operate in a first mode (or a normal mode; to access 13) and a second mode (or a configuration mode; to access 12A/B), wherein the interface connection: transfers (via 18A, 18C and 18D) information to or from the memory in the first mode; and transfers (via 19A and 19B) information to or from the supplemental information device in the second mode, wherein the supplemental information comprises configuration

ţ

information relating to the memory module (see, for example, column 8, lines 43-44 and column 9, lines 19-21).

## Allowable Subject Matter

- 7. Claims 6-8, 13-18 and 24 are allowed.
- 8. Claims 3-5, 10-12 and 20-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 9. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 3, 4, 6, 10, 11, 13, 14, 17, 18, 21, 22 and 24, the prior arts of record do not disclose or suggest a memory module wherein a configuration information accessed via a first connection (which is also used for accessing a RAM in normal mode) comprises SPD information or is transferred using SMBus protocols.

Regarding claims 5, 12 and 23, the prior arts of record do not disclose or suggest a memory module wherein only the chip select connection is used to signal the selected module for transferring supplemental information.

Regarding claim 20, the prior arts of record do not disclose or suggest a method wherein the step of requesting configuration information comprises accessing a configuration register associated with the memory system.

### Conclusion

Application/Control Number: 10/073,475

Art Unit: 2824

10. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure.

Trick (U.S. Pat. No. 5,995,405) discloses a memory module wherein a set of SPD pins

Page 5

are shared by two different EEPROM configurations.

Nguyen et al. (U.S. Pat. No. 6,055,600) discloses a method and an apparatus wherein

SPD clock and data are shared on same pins as parallel presence detect data.

Chang et al. (U.S. Pat. No. 6,148,398) discloses multi-function pins on a CPU package.

Nizar et al. (U.S. Pat. No. 6,532,526) discloses a method and an apparatus using SPD and

SMBus.
